Key words. galaxies: clusters: general – galaxies: elliptical and lenticular, cD – galaxies: evolution – errata, addenda

Because of a typographical error, our paper refers to the cluster SpARCSJ022426-032330 using the name “SpARCSJ021524-034331”. We give the right redshift and coordinates for its galaxies, and credited the correct discovery paper, but we mis-typed the cluster name everywhere in the paper: all measurements concerning the cluster we named SpARCSJ021524-034331 refer to SpARCSJ022426-032330 galaxies. No result of our paper is affected by having mis-typed the cluster name.
